Hi Paul,

Most of the substantive material in the comments against use of the IRIS URE came from the EO panel of the ACC. Their comments on the MON are attached.

Thanks,

Hi Kate,

I'll start working the new material this morning. I wonder if you can conveniently share the key comments you are responding to, so I can check context if needed?

Much appreciate all the effort you have put into this!

Paul

Hi Paul,

Attached is a list of IRIS URE-related RTCs for topics that are specifically mentioned in the MON preamble. I'm also attaching a response to comments on the IRIS peer review process for your review.

We welcome your feedback, particularly on the accuracy of technical details. It would be great if we can get your feedback on any showstoppers this week.
